WORK EXPERIENCE

Internshala

Software Development Engineer 1

Gurugram, India
Apr 2026 – Present

- Architected a fault-tolerant **RabbitMQ** payment layer re-validating false-negative CCAvenue/Setu events asynchronously, eliminating **100% of revenue leakage**.
- Refactored ad recommendation engine into a clean **OOP/LLD architecture** (Factory, Strategy, Decorator), making new rule integration significantly faster and eliminating cross-module side effects.
- Engineered backend integrations for brand campaigns (Myntra, Tata, PepsiCo) across **3+** product verticals.

Associate Software Development Engineer

Mar 2025 – Mar 2026

- Slashed **p95 API latency** via **Atatus APM** profiling, targeted **MySQL** indexing, query consolidation, and **Redis** caching on read-heavy endpoints.
- Overhauled **Elasticsearch** data models with multi-filter pipelines (gender, degree, location), boosting job discovery precision.
- Built a contextual job recommendation engine surfacing similar roles mid-apply, driving a **40% lift** in application completion rates.
- Designed an internal **CMS** with automated data pre-computation, eliminating manual overhead for stakeholders.

Software Development Engineer Intern

Sep 2024 – Feb 2025

- Integrated an AI layer into search for structured JD summaries and skill highlights; offloaded aggregations to **async cron jobs** to stabilize peak throughput.

RapidQuest

Software Development Engineer – Full Stack Intern

Remote
Jan 2024 – Apr 2024

- Designed and shipped a **RAG-powered CaaS** platform using **Python, Flask, LangChain, OpenAI API** and **MongoDB Vector Embeddings** as sole engineer, owning architecture through production deployment.
- Provisioned **AWS EC2** and configured **Nginx** as reverse proxy for reliable concurrent multi-tenant chatbot request handling.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (Node.js), Python, PHP

Backend & APIs: Express.js, Flask, LangChain, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, Redis, SQLite

Search & Messaging: Elasticsearch, RabbitMQ

Cloud & DevOps: AWS (EC2, S3), Nginx, Docker, GitHub Actions

Frontend: Next.js, React, TypeScript

PROJECTS

LLMScope – LLM Observability Backend & SDK

[GitHub](#) | [NPM](#)

TypeScript, Node.js, Express.js, PostgreSQL, Redis, Docker, Prometheus

- Designed a monorepo observability platform with a zero-dependency **TypeScript SDK** wrapping **OpenAI**, **Anthropic**, and **Gemini**; fire-and-forget transport with exponential backoff adds **zero latency** to the caller.
- Built an atomic **Redis** write-buffer bulk-inserting up to **500 traces/cycle** into **PostgreSQL** under **5ms**; hourly window functions pre-compute **p95/p99** rollups with re-queue on DB failure.

Real-Time Collaborative Text Editor

[GitHub](#) | [Live Demo](#)

Node.js, WebSockets, SQLite

- Engineered a custom **CRDT** (Fractional Indexing) for lock-free distributed state with **sub-100ms** sync; delta-diff payloads cut network overhead.

EDUCATION

B.Tech, Computer Science and Engineering

University Institute of Technology RGPV, Bhopal

Jun 2024

CGPA: 8.05
